

TEXAS SOVEREIGNTY & INFLUENCE SHIELD ACT

Already written. Ready Week 2.

Kenneth Hyde – Chief Author

Texas land. Texas rules.

No hostile foreign nation or agent will ever own our dirt or our decisions again.
One bill. Four historic wins.

1. **Permanent ban on land & home purchases** by governments of China, Iran, North Korea, Russia (and entities they control) plus cartel-linked organizations.
2. **Mandatory Texas Foreign-Agent Registry (Texas FARA)** — anyone taking money or direction from a foreign government must register publicly.
3. **Full transparency on foreign funding** to universities, think tanks, and NGOs.
4. **Criminal penalties + property forfeiture** for violations.

Right now — in January 2026 — hostile nations already own over 400,000 acres of Texas land [1] — including next to military bases, farmland, and water rights.

Cartels and foreign agents infiltrate with billions in hidden funding, writing our laws through lobbyists while the federal government looks the other way.

Texas sovereignty is under attack—our land, our decisions, our future.

This same threat comes from Austin-enabled corporate land grabs—like the massive 765kV transmission lines carving through family ranches via eminent domain to benefit billionaire data centers and crypto operations. No more letting elites or cronies steal our dirt while families lose their heritage. Texas stays Texas—protecting ownership from all invaders, foreign or domestic.

Responsible the Texas way: Exempts U.S. allies and lawful residents. Fair process with due process protections. Focuses only on hostile threats—protects freedom for all Texans.

This bill slams the door shut forever.

Ties directly to my **Texas Sovereignty Defense Act** (100% border security) and *Freedom Fund* (massive tax relief).

This isn't just talk.

This is ending foreign infiltration — protecting Texas land, jobs, and families — and using bold action to make Texas freer and stronger.

Pre-filed November 2025

Sovereignty-positive | Security-positive | Texas-first
